Valencia, 46018, Spain
Date of birth: 10/03/2010

TECHNICAL SKILLS

- Local area network (LAN) fundamentals
- TCP/IP model and basic protocols
- Operating systems: Windows and Linux
- Computer assembly and maintenance
- Cybersecurity fundamentals
- Static routing, SSH and Telnet
- Basic troubleshooting

TOOLS

- Microsoft Office (Word, Excel, PowerPoint)
- VirtualBox — Kali Linux
- Wireshark
- Cisco Packet Tracer

LANGUAGES

Romanian: Native

Spanish: Fluent (C1)

English: Fluent (C1)

PERSONAL SKILLS

- Ability to learn
- Responsibility
- Teamwork
- Problem-solving
- Communication
- Technical curiosity
- Punctuality

INTERNSHIP OBJECTIVE

Seeking a company for on-the-job training (FCT / work placement), preferably in:

- Cybersecurity
- Networks and IT infrastructure

INTERESTS

- Swimming

RADU HATOS

Student of Microcomputer Systems and Networks (SMR)

PROFESSIONAL PROFILE

I am a first-year student of the Intermediate Vocational Training programme in Microcomputer Systems and Networks (SMR) at IES Abastos (Valencia), with a strong interest in networks, infrastructure and cybersecurity. Alongside my studies, I am independently taking Ramon Nastase's Cybersecurity course, of which I have already completed the Networking and Linux modules. I consider myself a responsible person, with a strong ability to learn and technical curiosity, and I am actively seeking a company where I can carry out my on-the-job training (FCT / work placement), preferably in the field of cybersecurity or, failing that, in networks and infrastructure, bringing commitment, eagerness to learn and full availability.

EDUCATION

Technician in Microcomputer Systems and Networks (SMR) — Year 1 *2026 – Present*

IES Abastos, Valencia

- Intermediate Vocational Training, Computing and Communications professional family.
- Modules completed: Computer assembly and maintenance, Office applications, Single-user operating systems, and Local area networks.
- School with partnerships with ICT companies and experience in the Dual (paid internship) model.

Compulsory Secondary Education (ESO) *2022 – 2026*

- CODI Certification — Digital Skills Programme for Children (FutureCity), DigComp 2.2 framework, intermediate and advanced levels, 90 hours (see Annex 1).

ADDITIONAL TRAINING

Cybersecurity Course *In progress*

Ramon Nastase (ramonnastase.ro)

- Modules completed: Networking fundamentals and Linux.
- Self-taught training aimed at expanding practical knowledge of information security and systems administration.
- Academic reference available on request.

PROJECTS

Practical analysis of phishing and social engineering techniques

- I reproduced, in a controlled local environment (XAMPP, PHP and MySQL), a fake login page that captures the user's credentials, in order to understand how a phishing attack works and learn to recognise and defend against it.

Cisco network configuration and routing

- I designed, cabled and configured a two-site network in Cisco Packet Tracer with IP addressing, switches and routers, and static routing to provide end-to-end connectivity between both LANs.

Network infrastructure and secure remote access

- I expanded the network to three sites in Cisco Packet Tracer, adding DNS and HTTP services, remote access over Telnet and SSH, and static routing across a full mesh of routers.

Network traffic analysis with Wireshark

- I captured live network traffic with Wireshark and applied display filters (TCP, HTTP, ARP) to isolate and interpret connections, requests and address resolution at packet level.
